About Me

Software Engineering student at Universiti Kuala Lumpur MIIT with a specialized focus on Data Engineering and ETL development. Experienced in orchestrating complex data pipelines using SSIS to extract and transform data from Oracle production environments into structured Data Warehouses (Fact/Dim tables). Committed to engineering best practices, including implementing Git integration for SSIS and Power BI to ensure robust version control and data integrity.

Experience

Data Engineering

09/2025 – 02/2026

ATG Nexus | Puchong, Selangor, Malaysia

- Developed and maintained ETL workflows using SSIS for data integration and automation.
- Performed data migration from Pentaho to SSIS and ensured data accuracy through cleaning and validation.
- Designed and optimized Power BI dashboards to visualize key business metrics and support data-driven decisions.
- Implemented Git version control for SSIS and Power BI to ensure pipeline stability.
- Established a staging environment to decouple data extraction from reporting layers.
